And in the middle of the process, when your thoughts smoothly flow from your head into the text editor; when no slightest is needed from anybody; when the inspiration is overflowing; when you feel on the verge of the greatest finding in the history of humanity – dear Lord! Word just crashes or freezes.. In case, Word doesn't request file recovery permission from you, most likely it failed to save the edits, and there's nothing to restore.. If you've never suffered such a tragedy, you must be the luckiest person on Earth and should definitely play lottery right about now.

To partly recover the document you have been working on, try printing out the screen.. Let's say, you are writing your term paper seeking an answer to the question that would make the life of millions of people around the entire globe much easier and more comfortable (for example, Do Woodpeckers Get Headaches?).. Also, check if the autosave options are set in Word's preferences to make sure at least a part of your file is recoverable.. Experiencing a Word freeze-up in the middle of working on something important is very stressful.. If you use Time Machine backups and the default backup frequency is one hour, chances of file recovery are quite high.. After that, try force-quitting the application by using the Command-Option-Esc shortcut.. When the Force Quit window appears, select the app you want to abort and press Force Quit.. However, Word saves the file edits automatically, so it can help you recover the information after restarting the program. e828bfe731 [Vecera \[Croatia\]](#)
