# TrendManager Suite®

## Specification

PC Application Software Configuration and Analysis Tool

43-TV-03-09  
April 2010

- The TrendManager Suite software is a Windows™ based PC package that complements the Honeywell line of data acquisition products. It provides the capability to configure, analyse and network recorders for data acquisition.
- The TrendManager software ties your process together, providing access to the recorder through the plant LAN or the Internet, while keeping a high level of security.
- TrendManager provides the tools for real-time communication, data analysis and configuration for the entire family of X Series and V5 paperless data recorders.
- The application can import and analyse electronic data from the HC900 Honeywell Modular Systems and DPR180/250 Strip Chart recorders.
- The software is designed for use on Microsoft Windows™ 2000, Windows™ XP, Windows™ 2003 server with Standard Edition and Windows™ Vista with Business and Ultimate Edition platforms and networks.
- The TrendManager Suite is easy to use and is available in English, French and German languages. The software is simple using "Drag-and-drop" operations, clear menus and logical configuration wizards to help the operator set up and analyse data from the recorders.
- Protocol/Document Custom built IQOO reports can be generated based on the configuration of the recorder.

The screenshot displays the TrendManager Suite software interface. On the left, there is a Windows-style taskbar with icons for Start, My Computer, Recycle Bin, and several application windows. The main area is divided into several panels. The top-left panel shows a list of data acquisition channels with columns for 'Channel Name', 'Unit', and 'Status'. Below this, there are several waveform plots showing data over time. The right side of the interface features a larger plot area with multiple overlapping waveforms in different colors (red, green, blue, purple). The bottom of the window shows a status bar with the text 'HONEYWELL' and 'PC: 10.10.10.10'.
